4 <sup>th</sup> Nine Weeks	Language Arts- Letter & Opinion Writing, Dialogue Reading-Novel Study, Literature Circles Math – Geometry Project, Plan a Trip, Exemplars STEM/STEAM – Geometry Project, Life Cycles PBL, Lego Enrichment, Design an Original Math Game, Coding	

**The above outline is subject to change, but should be considered as a reference for second grade whole class and gifted enrichment.** The project outline and rubrics will go home at the beginning of each at-home project along with the due date. If you have any questions about the projects make sure you ask before you get started. Read over the rubrics carefully to see how it will be graded. Pacing yourself and organizing your thoughts in a timely manner will be very important. Waiting until the last minute will not be acceptable. These projects and activities are designed to encourage students to enhance their learning throughout the year. We also hope students learn organizational skills that will help them for the rest of their educational careers.

**Weekly Homework Outline:**

Students receive a homework packet every Monday which is due Friday. If your child is having trouble doing this on their own let us know, and we will be sure to check on them. The assignments are related to classwork and the Second Grade standards, and vary from week to week. Each Math teacher may differentiate their homework to provide additional enrichment opportunities.

Daily conduct is recorded in the Agenda. Please sign the Agenda every day.
